# One-stop centre for health food supplement solutions

WITH over 15 years of experience in manufacturing healthy food with its patented Plant Extraction Process and managed by professional nutritionists, biomedical scientists and engineers, Bionutricia Manufacturing Sdn Bhd is a one-stop health food supplement solutions which include design, product registration, write-up and production until the end product.

Established by Ng Kuak Ping who hails from Penang, he was inspired by his grandfather who owned a Chinese medicine hall and also due to the death of his mother (from liver disease) and grandfather at a very early age.

With an objective to deliver essence of natural heritage to enrich health and beauty for all, Ng started Bionutricia Holding Sdn Bhd in 2006 as a specialty food (nutraceutical), beverage and traditional plants (herbs) trading company and by 2008, he managed to raise enough money to rent a small factory to grow his business.

Since then, it has grown from a small company to a well-established one-stop raw material supplier with warehousing and transformed to what it is today – a manufacturing plant and laboratory known as Bionutricia Manufacturing Sdn Bhd.

Certified by GMP, HACCP, Jakim, MeSTI, FDA and Kosher. Bionutricia hopes to get its FSSC 22000 certification by the third or fourth quarter of 2020. This helps Bionutricia to ensure the product's quality and consistency.

Bionutricia also has a reliable research and development team tied with universities and Forest Research Institute Malaysia (FRIM).

This is to customise an effective and proven formulation for the benefit of consumers.

On top of that, Bionutricia is also an expert in Extraction manufacturing natural supplement products in the form of liquid/gel, powder, chewable tablet and herbal gourmet beverage.

This manufacturing company also provides services such as customised label and product registration to BPEK/NPRA, supply of plants and raw materials of standard plant extracts, and supply of bakery ingredients for food and beverage manufacturers.

Also available are plant extraction manufacturing of high-nutrition food supplements with tropical plant extracts alongside on-demand plant and herbal extraction service.

## Key products

Some of its key products include standardised herbal ingredients that are phytochemical active compounds from local plant extract such as tongkat ali, kacip fatimah, pegaga, misai kucing, manjakani and more.

Another highlight product is its natural food ingredient – made from natural flavour, colour and phytonutrient for gourmet culinary and bakery such as extracts of pandan, lemongrass, roselle, butterfly pea and vanilla.

Bionutricia also offers value-added services such as:  
 – granulation – coating, bitterness masking and improve solubility  
 – liquid nanotechnology – lipid metabolite in nano particle to enhance body absorption
